

Bespoke Customer Special Extrusions

In addition to our standard extrusion stock, we offer all our customers a complete design, manufacture and stocking package of bespoke extrusions from single extrusions to full suites all tailored to suit our customers individual requirements.

Our experienced Engineering sales teams are happy to assist and advise throughout the extrusion design process, either from a basic idea/sketch or alternatively straight from CAD drawings.

Service Metals have the resources and expertise to deliver extrusions that meet our customers specifications and needs. The initial tooling costs are surprisingly small, with huge manufacturing cost benefits to be gained.

Special extrusions allow for complex features such as screw ports, strengthening ribs, sleeving, corner cleats, decorative features, sections which snap together or combine integral hinges, the possibilities are endless, all designed to simplify assembly and reduce manufacturing time scales.

We also offer pre-finished extrusions, either anodised or powder coated, which can also offer additional cost benefits.
